Repository (print)**: https://github.com/ j-otterbox/349-group-project**
Scoring

Factor	Score	Comments
Quality of Presentation (must include equal participation by all members)	1 2 3 **4** 5	
Quality of documentation for installing, configuring, and using the application	1 2 3 **4** 5	
Project scope and functionality	1 2 3 4 **5**	
Code quality	1 2 3 **4** 5	
Innovation and web design	1 2 3 4 **5**	
Teamwork	1 2 3 **4** 5	
Total	26	

General comments:
Zakee: Great design.
Rene: Website looks great.
Chukwudi: Liked authentication, and that it sends emails to new users.

Fill out and print this page, and submit it on the day this project is due.

Scoring

Factor	Score	Comments
Quality of Presentation (must include equal participation by all members)	1 2 **3** 4 5	
Quality of documentation for installing, configuring, and using the application	1 2 **3** 4 5	
Project scope and functionality	1 2 3 **4** 5	
Code quality	1 2 3 **4** 5	
Innovation and web design	1 2 3 **4** 5	
Teamwork	1 2 3 **4** 5	
Total	22	

General comments:
Zakee: Auth and account-related info was cool to see.
Rene: Presentation dragged a little.
Chukwudi: Liked simple layout. Latest posts page is static - could be expanded on in future.

Fill out and print this page, and submit it on the day this project is due.

General comments:
Zakee: Comic Sans on a blue background? Squashed images on the landing page? Really?
Chukwudi: Should probably use responsive techniques to make your website better on more screens.
Rene had no additional comments.

Fill out and print this page, and submit it on the day this project is due.

Code quality	1 2 **3** 4 5	
Innovation and web design	1 2 **3** 4 5	
Teamwork	1 2 3 **4** 5	
Total	23	

General comments:
Zakee: After the landing page, aesthetic took a downturn - could be improved.
The use of the SQLAlchemy library could improve the amount of redundant code you're writing.
The use of SQL strings may be open to a SQL Injection attack - did you test for this?
Chukwudi: Presentation was good, included motivations and inspirations, and it flowed
well.
Rene: A better design for your website would have helped a lot, as well as using SQLAlchemy to
condense database queries.

Fill out and print this page, and submit it on the day this project is due.

Teamwork	1 2 3 **4** 5	
Total	19	

General comments:
Zakee: USE ARRAYS! Also where's your README, video presentation, docs?
Chukwudi: Webpage looks great. Redundant lines of code drag the project down.
Rene: It's good that you can make a quiz for any characters you want.

Fill out and print this page, and submit it on the day this project is due.

General comments:
Zakee: That shade of green isn't the most appealing.
Chukwudi: The project looks alright, and it is an interesting concept.
I do feel like there is something about the website that appears dull.
That said, it works as needed and gets the job done. Clean presentation, Good work
Rene: Pretty plain, everyone seems to be using a lot of green for backgrounds...

Fill out and print this page, and submit it on the day this project is due.

General comments:
Zakee: Professional aesthetic and great design - well done.
Chukwudi: Love the seperation of concerns at display here.
Not only was the website very well developed, it also looks appealing.
This website stood out to me on first glance. Excellent work.
Rene had no additional comments.

Fill out and print this page, and submit it on the day this project is due.

Innovation and web design	1 2 **3** 4 5	
Teamwork	1 2 3 **4** 5	
Total	21	

General comments:
Zakee: Aesthetic could use work.
Chukwudi: The documentation gets the job done, but there could have been a little more formatting. I think that the website has a lot of empty space in it, and the text doesn't quite seem to fit with the background.
Rene: Could have used more work on the front end. Adding a button to refresh options instead of clicking the title would have been nice.

Fill out and print this page, and submit it on the day this project is due.
